## Upper Etowah River Alliance

The Upper Etowah River Alliance is a community-based organization dedicated to protecting the Etowah River through education and conservation. We believe in a cooperative approach that balances the needs of a healthy environment with those of land owners.

To reach for our vision of a clean and healthy Etowah river, we focus on education and conservation, with an emphasis on water quality and nonpoint source pollution. We accomplish this mission through workshops, presentations, brochures and on the ground demonstration projects. We also provide assistance to citizens who wish to protect the watershed by improving their land steward practices.
